Deliverable 2

Name: Junior Nunez

Date: 11/12/21

Due date: End-Of-Semester

The project being created is the creation and foundation of a ubuntu version 20.04 virtual machine which is ready for use. Ready for use of everyday users just as if it were going to be use for regular browsing and use of programs included.

- Hypervysor - VirtualBox (Oracle)

- OS - Ubuntu 20.04
